ABOUT US

Company Profile

AG Facade Technology is a specialist aluminum, glazing and facade company based in Dhaka, Bangladesh. We design, fabricate and install premium double-glazed windows, doors and curtain wall systems, working closely with architects, developers and distributors to deliver lasting value on every project.

Our double-glazed windows and doors are engineered using premium Chinese aluminum profiles, offering outstanding thermal and acoustic insulation. Double-glazed glass is internationally recognized for cutting energy consumption by up to 25% and reducing outside noise by 50-60%, keeping interiors comfortable and peaceful throughout the year.

Leading nations such as Canada, Australia, the United States and countries across the European Union already mandate double-glazed systems in their building codes to save energy and improve quality of life. AG Facade Technology brings this same standard of performance to homes and commercial spaces across Bangladesh.

VISION & MISSION

What Drives Us

- A strong, dedicated technical team
- Excellent product quality on every project
- Excellent after-sales service and support
- The spirit of quality and credibility in everything we do

OUR GLOBAL PARTNERS

The Foundation of Our Excellence

*At **AG Facade Technology**, we believe that every successful project begins with quality, precision, and a commitment to excellence. We focus on delivering modern façade and building solutions that combine innovative technology, durable materials, and thoughtful design. Through careful attention to every stage of our work, we strive to create solutions that enhance the appearance, performance, and long-term value of every project. Our commitment is simple: to provide dependable products and professional service that our clients can trust.*

THERMAL BREAK CASEMENT WINDOWS

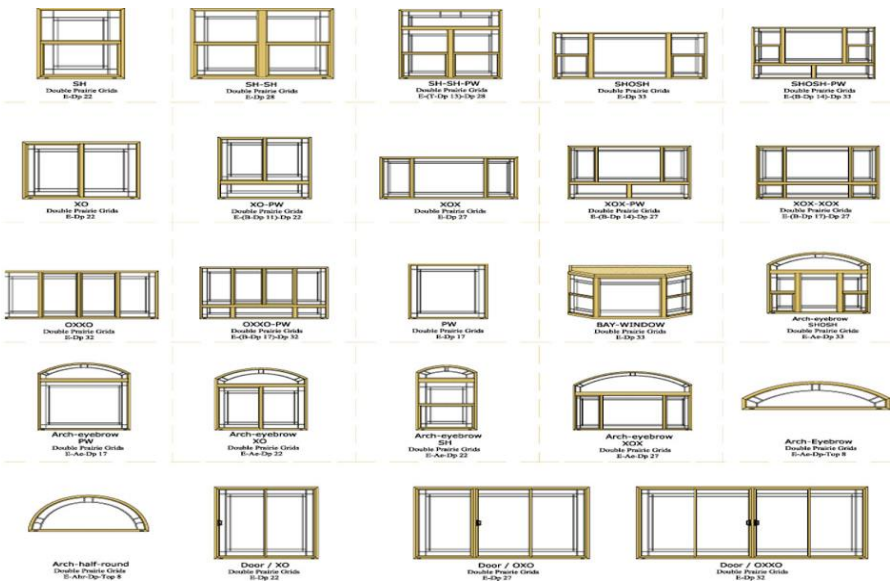

- **Engineered with Mastery. Designed for Comfort.**

Quiet Comfort & Energy Efficiency -Multi-chamber profiles, advanced sealing, thermal breaks, and Low-E glass reduce outside noise and heat transfer, creating a quieter, more comfortable, and energy-efficient interior.

Strength & Security -Premium aluminum alloy and precision-engineered components provide excellent strength, wind resistance, and durability. Multi-point locking adds enhanced security and lasting peace of mind.

Basic Styles

DESIGNED AROUND YOUR LIFE

Every Window, A Frame for Your Home.

At **AG Facade Technology**, we believe that windows and doors are more than architectural elements—they are the connection between your home and the world outside. They welcome the warmth of the morning sun, the freshness of the evening breeze, and the joyful moments shared with family.

Designed to blend beauty, comfort, and functionality, our windows and doors create a seamless connection between indoor spaces and the surrounding environment. Every frame is thoughtfully designed to bring natural light, beautiful views and a sense of openness into everyday living.

- **Framing the beauty around you. Bringing the poetry of life into your home.**

WEATHERPROOF PERFORMANCE

Keep The Storm Outside, The Warmth Inside.

An “Invisible” Umbrella For Your Home.

When storms arrive, our doors and windows act like a sturdy, invisible umbrella. They silently guard, keeping out rain and chill, leaving you only with the warmth and comfort of your entire home.

When storms arrive, our doors and windows act like a sturdy, invisible umbrella — silently guarding against damp and chill, so your home keeps only the warmth and comfort inside.

SUPERIOR SOUND INSULATION

Designed for Comfort. Engineered for Freedom. Built with Clarity.

- THE ULTIMATE QUIET EXPERIENCE → *Comfort* through sound insulation
- MEDIUM & NARROW FOLDING DOORS → *Freedom* through flexible opening and space
- GLASS CURTAIN WALL → *Clarity* through openness, light, and modern design

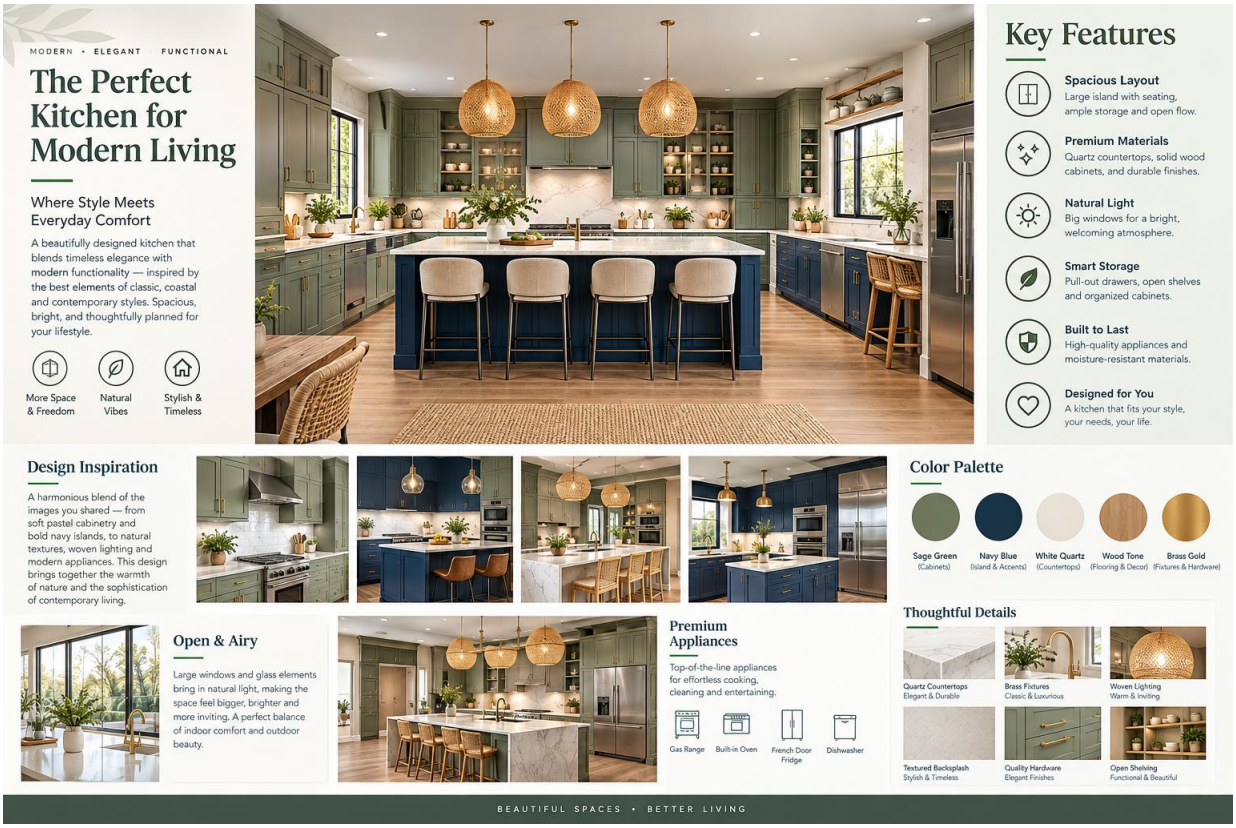

OUR PRODUCT RANGE

Beyond Windows & Doors, We Build Complete Facade Solutions.

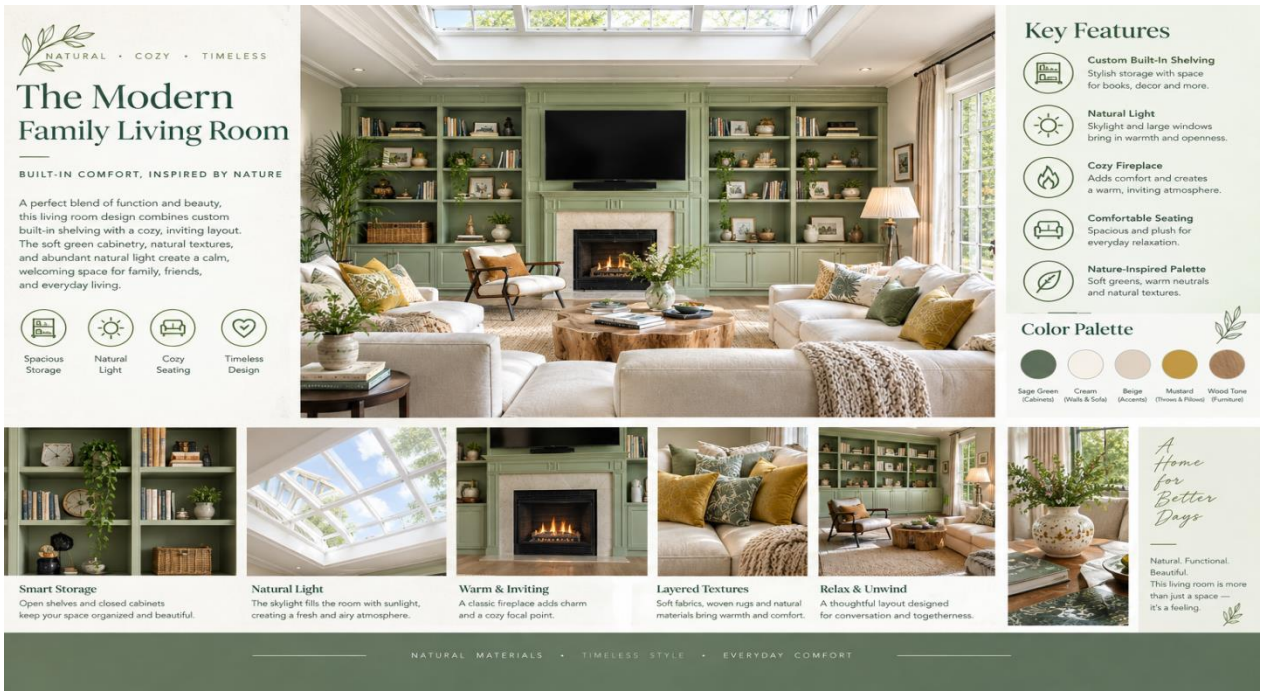

*At **AG Facade Technology**, our expertise extends beyond windows and doors to include **louvers, curtain wall systems, and visible (exposed-frame) curtain walls**. We provide modern façade solutions that combine **functionality, durability, energy efficiency, and architectural elegance**, helping transform both residential and commercial buildings into comfortable, high-performance, and visually distinctive spaces.*
